Product Description

Product Name: AD25B adblue dispenser

Playing its part to help reduce harmful emissions, AdBlue dispenser is used in modern diesel engines and is considered an essential part of a modern forecourt. AD50B adblue dispenser is available as a stand-alone model but can also be configured as a back-to-back model to offer up to three conventional fuels alongside the AdBlue fluid in the same frame. With a contemporary design that could modernise any forecourt, this dispenser can take your forecourt to the next level.

Our Ad25B adblue dispenser, with inner FRP tank, it can realize that fueling in station or mobile fueling function.
