Product Description

Product Description:

The Fuel Dispenser Keyboard Membrane, a high-performance protective solution designed specifically for 22-key horizontal plastic keyboards commonly used in fuel dispensers. Crafted with durability and precision, this keyboard film ensures long-lasting protection while maintaining exceptional operational efficiency.

Key Features:

Superior Durability: Engineered with high-grade wear-resistant materials, it withstands frequent use and harsh environments, effectively preventing scratches and abrasions.

High-Temperature Resistance: Withstands temperatures up to 55°C, ensuring stable performance even in high-heat conditions typical of outdoor fuel stations.

Enhanced Sensitivity: Ultra-thin design (0.3mm thickness) preserves tactile feedback and keystroke accuracy, ensuring seamless interaction without compromising typing speed.

Cost-Effective Protection: Budget-friendly pricing without sacrificing quality, offering an economical solution for large-scale deployments.

Technical Specifications:

Material: Premium thermoplastic polymer (TPU/Silicone composite)

Thickness: 0.3mm (optimized for minimal key travel interference)

Operating Temperature: -40°C to 55°C

Water & Dust Resistance: IP54-rated protection against spills and particulate ingress

Compatibility: Precisely molded for 22-key horizontal layouts.

Certifications: Complies with RoHS and REACH environmental standards.
